

## CHART ON THE UNIVERSALITY OF THE LAW OF THE UNITY AND STRUGGLE OF OPPOSITES

*There is a contradiction in a thing remaining the same and yet constantly changing, being possessed of the antithesis of "inertness" and "change." — Frederick Engels*

### EXAMPLES OF OPPOSITES THAT ARE CONTRADICTIONS

An atom consists of	A positive nucleus	and Negative electrons
Planets move under the impact of the forces of	Attraction	and Repulsion
Metabolism includes	Assimilation	and Dissimilation
In Mechanics	Differential	and Integral
In Physics In Chemistry	Positive Association	and Negative Electricity and Dissociation of Atoms
Capitalist Society	Capitalist	and Worker

### EXAMPLES OF OPPOSITES THAT ARE ANTAGONISTIC

Robotic Production	Wage Labor
Capitalism	Communism
